

CONTENTS

R. Bellman and R. Kalaba: A note on Hamilton's equations and invariant imbedding	166
J. P. Benthem: On the stress distribution in anisotropic infinite wedges	189
T. C. Benton: An example of the need for two stream functions in three-dimensional flow	235
G. Birkhoff: A variational principle for nonlinear networks	160
B. A. Boley: Upper and lower bounds for the solution of a melting problem	1
J. R. Cannon: The solution of the heat equation subject to the specification of energy	155
S. Childress: An unsteady problem in magnetohydrodynamics	76
T. S. Chu and S. N. Karp: The field of a dipole above an infinite corrugated plane	257
R. W. Cottle: Symmetric dual quadratic programs	237
H. H. Denman and J. E. Howard: Application of ultraspherical polynomials to nonlinear oscillations-I. Free oscillation of the pendulum	325
J. H. Giese: Partially constrained impinging jets	331
K. J. Harker and J. Llacer: Conditions for the solubility of an elliptic difference equation as an initial value problem	223
G. Herrmann: On variational principles in thermoelasticity and heat conduction	151
P. G. Hodge, Jr. (<i>see G. J. Megarefs</i>)	
J. E. Howard (<i>see H. H. Denman</i>)	
R. Kalaba (<i>see R. Bellman</i>)	
J. Kane: The mathematical theory of a class of surface wave antennas	199
S. N. Karp (<i>see T. S. Chu</i>)	
R. D. Kodis (<i>see W. Streifer</i>)	
W. E. Langlois: Steady flow of a slightly viscoelastic fluid between rotating spheres	61
S. L.-Lee (<i>see T. Mura</i>)	
M. Lewin (<i>see R. A. Schmeltzer</i>)	
J. Llacer (<i>see K. J. Harker</i>)	
O. L. Mangasarian: Correction to the paper "Duality in nonlinear programming"	252
G. J. Megarefs and P. G. Hodge, Jr.: Singular cases in the optimum design of frames	91
K. S. Miller: A note on input-output spectral densities	249
J. A. Morrison: On the eigenfunctions corresponding to the bandpass kernel, in the case of degeneracy	13
T. Mura and S. L. Lee: Application of variational principles to limit analysis	243
P. M. Naghdi and R. P. Nordgren: On the nonlinear theory of elastic shells under the Kirchhoff hypothesis	49
G. F. Newell: Synchronization of traffic lights for high flow	315
R. P. Nordgren (<i>see P. M. Naghdi</i>)	
T. A. Oliphant: A note on extrapolation procedures for solving linear systems	72
W. E. Olmstead and S. Raynor: Solar heating of a rotating solid cylinder	81
R. S. B. Ong: An integral equation occurring in plasma oscillations	162
R. G. Payton: An application of the dynamic Betti-Rayleigh reciprocal theorem to moving-point loads in elastic media	299
S. Raynor (<i>see W. E. Olmstead</i>)	

E. Reissner: On stresses and deformations in toroidal shells of circular crosssection which are acted upon by uniform normal pressure	177
C. N. Rollinger: Lommel functions with imaginary argument	343
R. M. Rosenberg: The ATEB(H)-functions and their properties	37
J. L. Sanders, Jr.: Nonlinear theories for thin shells	21
R. A. Schmeltzer and M. Lewin: Function-theoretic solution to a class of dual integral equations and an application to diffraction theory	269
C. B. Sharpe: On the synthesis of infinite lines	105
C. B. Sharpe: Some properties of infinite lines	337
W. Streifer and R. D. Kodis: On the solution of a transcendental equation arising in the theory of scattering by a dielectric cylinder	285
R. A. Struble: Oscillations of a pendulum under parametric excitation	121
L. N. Tao: The associated elastic problems in dynamic visco-elasticity	215
T. C. T. Ting: On the solution of a non-linear parabolic equation with a floating boundary arising in a problem of plastic impact of a beam	133
BOOK REVIEWS. 12, 20, 48, 60, 79, 104, 132, 169, 188, 253, 284, 314, 350
